GROUP COMMANDER MADRAS.
GROUP 'A' NCC.**

**LET US JOIN HANDS TO GIVE THE GIFT OF LIFE.
EVERY DROP OF YOURS IS SOMEONE'S SECOND CHANCE TO LIVE.**

WHY SHOULD WE DONATE BLOOD?

SAVE LIVES

Every time we donate one pint of blood it helps save three lives, so if we donate four times in a year we end up saving 12 lives. There is no other method to manufacture blood; the only way to collect blood is from the people who are willing to donate.

HEALTH BENEFITS

Once we donate blood, the body tries to restore the blood loss by production of new blood cells which helps in maintaining good health. Blood donation lowers cholesterol level and reduces risk of heart attacks, liver ailment, cancer, hemochromatosis. Blood donation also speeds up healing process of the body.

TNDALU NCC INVITES YOU TO THE BLOOD DONATION CAMP

Venue: Amenities block, School of excellence in law, Taramani
